

## **ITA Project – White Clouds, Baker Lake**

**Pack-In – Sunday August 12, 2018**

**Pack-Out – Saturday August 18, 2018**

### **Trail Head – Little Boulder Creek – East Fork of the Salmon River**

Description:

*Will your group be able to pack for the ITA/ White Cloud trip to Little Boulder Creek/ Baker Lake August 12-18? (Near Frog Lake)*

*We were unable to hire a packer this year with tighter budget. It was either a packer or several less expensive crew members. The crew will be smaller as is. I will be packing for our trail crews and working with them and will not have time to pack for the ITA trip.*

*It would be a great help.*

*The Little Boulder Creek BLM trailhead is about 2 miles past end of paved road on East Fork of Salmon River. The trail starts about ¼ mile up road past trailhead to get around cliffs above road. It is about 7 miles in to Baker Lake. Our trail crew worked the trail last year including a reroute around some nasty sections. The last 1/3 mile up to the lake has some steep sections. The rest of trail is in pretty good shape. The non-wilderness part of trail (first 6 miles) has a fair amount of motor bike and mountain bike traffic. I have never had any bad encounters. Not as stressful as taking stock to Sawtooth Lake.*

*We have requested Sawtooth Society crews clear trail prior to trip.*

*There is some small debris left over from mining exploration scattered around the area the volunteer crew will be gathering up to pack out sometime. Thank you, Jay*
